Fax: 807-852-1219
Email: mshute@efgroupllc.com or gsmith@efgroupllc.com

Terms and Conditions

1. It shall be the responsibility of the Applicant to hand-expose the natural gas pipeline facility, in the presence of a Centra Pipelines (“Centra”) representative, to ascertain its exact location and to excavate and backfill a minimum of 1 meter (3 ft) in any direction of the natural gas pipeline by hand, with particular care being taken not to damage the pipeline coating.
2. Once the construction of the facility has commenced, it shall be carried out as expeditiously as possible and backfilling over the natural gas pipeline shall be completed as soon as possible.
3. Natural gas pipelines left suspended in excavation greater than 3 meters (10 ft) in length shall be adequately supported. In all excavations where a natural gas pipeline has been exposed, backfill shall be compacted at least to the top of the pipe.
4. Any changes made to the design or the conditions under the Permit must be approved by Centra prior to construction. Approval for minor changes may be obtained by verbal communication followed by as-built drawings as necessary, within 30 days of the installation. Major changes may require re-application.
5. All construction must comply with the applicable rules and regulations of any authority having jurisdiction over the work or the facility being constructed.
6. Any person assigned by Centra to inspect a crossing shall have unrestricted access to the job site at all times, however, full responsibility for the safe performance of the work remains with the owner of the crossing and the contractor responsible for the work. Centra personnel will not enter an unsafe work area that is not in compliance with Workman’s Compensation Board or OSHA regulations.
7. The Applicant shall ensure that all subcontractors comply with all the requirements as contained herein and that they are adhered to in all respects.
8. The Applicant shall indemnify and safe harmless Centra against any and from all costs, damages, actions, proceedings, claims and demands, whatsoever arising and by whosoever incurred, brought, made or prosecuted, caused directly or indirectly as a result of the construction.
9. The Applicant releases Centra of and from all manner of action, suit, debts, sums of money, claims, demands whatsoever, either at law or in equity, which it has or may at some time have, by reason of the existence or operation of the natural gas pipeline except insofar as a result from the negligence of Centra.
10. The Applicant agrees that prior to commencing construction or excavation within the Centra pipeline Right of Way or near Centra facilities it will obtain the necessary permits, orders or authorization from all Authorities having jurisdiction over such activities and all parties having an interest in any lands affected by such activities.
11. The approved Permit may be cancelled at any time prior to construction or after commencement of the work stipulated in the Permit by Centra should the Applicant fail to observe and perform the applicable Terms and Conditions set out herein as well as all reasonable instructions of the Centra representative on site.
12. This permit is valid for a period of up to one year after the date issued. If the crossing has not been completed within one year then re-application for the crossing will be necessary.

RIGHT OF WAY CROSSING APPLICATION

Drawings, Plans and Specifications

The following information is to be included with all right of way crossing applications:

1. Drawing including:
 - a. Date
 - b. North arrow
 - c. Complete land description
 - d. Plan view
 - e. Profile view

2. Facility Description and Specifications
